I am a responsible Junior Full-Stack developer with a self-learning ability and patience. I am seeking to integrate into challenging projects to enhance and expand my professional knowledge in programming and delve into various technologies. My aspiration is to create creative and efficient solutions for technological challenges and contribute to the development team.

EDUCATION

Python Full Stack Development | John Bryce *2022 - 2023*

Manual QA | Haker U *2021- 2021*

PROJECTS

Personal Portfolio Website

I am currently working on developing a website aimed at showcasing my skills and progress. The website is based on an API Restful Django and a client interface utilizing Angular. The site includes dynamic functionality such as CRUD operations and user authentication. On the site, you can see all the information about my studies and the skills I have acquired, my previous projects, and even rate them. There is also a demonstration store to display understanding of e-commerce platforms.A blog where I incorporated a Joke generator feature, adding a touch of user engagement to the platform and read about my experiences

Movie Rating Application:

The application includes a RESTful API on the server-side, a web application with a user interface on the client-side, and a mobile application on Android.
In the application, user authentication and CRUD operations are performed. The project was mainly developed using Django, Angular, and NativeScript.

WORK EXPERIENCE

Shift Supervisor | Super Pharm   **july 2021 - present**

The role of a Shift Supervisor at Super Pharm requires the ability to work under pressure, manage time effectively, and maintain good interpersonal relationships. I am dedicated to maintaining the quality of work even when faced with challenges and time constraints. This role enables me to increase my contribution to the organization and achieve positive results for both the team and the customers.
